Product description

A-60 Fire resistant side-scuttle window having maximum clear size of D800 mm The glass compound, type "Saint-Gobain Vetrotech" and having minimum total thickness of 47 mm, is composed, moving from the exposed side, of four toughened panes, 5 mm thick each and, in between, athermo-expanding gel layer (alkali-silicate), a void space 14 mm thick and a toughened pane having thickness of 6 mm. The frame is composed of a steel flat, 12 mm thick, welded to a steel flat having thickness of 8 mm and fixed, by means of stainless steel M6 screws, to a stainless steel flat, fitted on the exposed side, having dimensions of 40x5 mm. Between the glass faces, the frame and the glass retaining frames, silicone fire Gasket having dimensions of 20x5 mm, are fitted. Between the glass edges and the frame intumescent gasket type Gluske Flexterm, 2 mm thick and, on the lower part, spacers type Calcium Silicate-Promatech block is fitted. The window frame may be welded or bolted to the bulkhead.

Field of application

Fire resistant A-60 Class side scuttle with fire hazard on the inner side of the application.
